

Clock Solitaire

The Pack

A standard 52 card deck is used

The Deal

Shuffle the deck and deal cards into 13 piles, face down, 4 cards per pile. Arrange 12 of the piles into a circle to represent the numbers on a clock dial.

Put the 13th pile into the center of the clock.

The Play

Pick up the top card on the 13th pile, in the center of the clock. Place the card face up underneath it's position on the clock - if you turn up a 4, place it face up under the "4" position on the clock.

Then, turn up the top card of the pile that you just placed a card under and play that card, continuing until you have played all cards.

Number cards are played at their face value, Aces are 1, Jacks are 11, Queens are 12, Kings are 13 (or the center pile).

To win the game you must place all cards face up in their respective piles.
