

# Henway Poker

## The Pack

The standard 52 card deck is used

## Object of the Game

A split pot game where the highest and lowest hands split the pot.

## The Deal

Each player is dealt 10 cards, facedown.

## The Play

Players divide their ten cards into two piles of five cards each, arranging their cards in any order they wish, in face down stacks.

There is a betting round, starting with the player to the dealers left. After all bets are made, players flip over the first card from each of their two stacks.

There is a second betting round, and then players flip over the second card from each of their two stacks.

Betting continues for five rounds, with each player flipping over a card from each of their stacks.

The players with the highest and lowest hands win and split the pot.

## Poker Hands

Five of a Kind - This is the highest possible hand and can occur only where at least one card is wild, such as a joker. Examples of five of a kind would be four 10s and a wild card or two queens and three wild cards.

Straight Flush - This is the highest possible hand when only the standard pack is used, and there are no wild cards. A straight flush consists of five cards of the same suit in sequence, such as 10, 9, 8, 7, 6 of hearts.

Four of a Kind - This is the next highest hand. An example is four aces or four 3s.

Full House - This colorful hand is made up of three cards of one rank and two cards of another rank, such as three 8s and two 4s.

Flush - Five cards all of the same suit, but not all in sequence, is a flush. An example is Q, 10, 7, 6, and 2 of clubs.

Straight - Five cards in sequence, but not all of the same suit is a straight. An example is 9♥, 8♣, 7♠, 6♦, 5♥.

Three of a Kind - This combination contains three cards of the same rank, and the other two cards each of a different rank, such as three jacks, a seven, and a four.

Two Pairs - This hand contains a pair of one rank and another pair of a different rank, plus any fifth card of a different rank, such as Q, Q, 7, 7, 4.

One Pair - This frequent combination contains just one pair with the other three cards being of different rank. An example is 10, 10, K, 4, 3.

No Pair - This very common hand contains "nothing." None of the five cards pair up, nor are all five cards of the same suit or consecutive in rank. When more than one player has no pair, the hands are rated by the highest card each hand contains, so that an ace-high hand beats a king-high hand, and so on.
